Q2 2025 Fund Commentary

Market Commentary

Global equities rose over the second quarter of 2025 and outperformed global bonds, which posted a small gain (all returns in Canadian-dollar terms on a total return basis). The U.S. paused higher tariffs as it worked on trade deals. Late in the quarter, the U.S. and China reached a framework for a trade deal.

The U.S. equity market gained, with strong performance from the information technology sector. Canadian equities increased and outperformed U.S. equities. Information technology was the strongest-performing sector in the Canadian equity market. EAFE equities advanced, outperforming U.S. equities but underperforming Canadian equities.

Italy and Spain contributed to the performance of EAFE equities. Emerging markets equities also gained and outperformed their developed market peers, with Taiwan and India contributing to performance.

The FTSE Canada Universe Bond Index posted a total loss of 0.6% over the quarter. As government yields moved higher, government bond prices declined. Government bonds underperformed corporate bonds, which posted a small gain.

Corporate bond prices benefited from narrowing credit spreads (the difference in yield between corporate and government bonds). Real estate bonds posted the largest increase in the corporate sector. High-yield bond prices rose on a total return basis and outperformed investment-grade corporate bonds.

Global bond yields declined over the quarter, and global bond prices increased. The European Central Bank and the Bank of England lowered their policy interest rates. The Bank of Canada, the U.S. Federal Reserve Board and the Bank of Japan held interest rates steady.

The yield on 10-year Government of Canada bonds rose from 2.97% to 3.27%, while government yields in the U.S. were largely unchanged. Government yields in the U.K., Germany and Japan declined.

Performance

Overweight exposure to corporate bonds had a positive impact on the Fund's performance, particularly in financials. Exposure to federal bonds had a negative impact on performance as yields rose.

IPC Private Wealth Visio Balanced Pool Series I

In equities, the Fund's relative exposure to TD Bank, CCL Industries Inc. and CAE Inc. had a positive impact on performance. TD Bank benefited from easing tariff concerns and reported better-than-expected earnings. CCL reported strong first-quarter results and continued to return cash to shareholders. CAE announced a new President and Chief Executive Officer, which investors viewed as positive.

Relative exposure to Merck & Co. Inc., Kimberly-Clark Corp. and Comcast Corp. was negative for performance. Merck, despite positive earnings, was affected by issues related to its Gardasil vaccine sales in China. Kimberly-Clark posted lower-than-expected first-quarter earnings and revised its outlook downward. Comcast reported a decline in revenue because of its broadband segment as it lost customers to competitors.

At the sector level, stock selection in financials had a positive impact on performance, as did a lack of exposure to energy and utilities. Stock selection within information technology, communication services, industrials and consumer discretionary had a negative impact on performance. Underweight exposure to information technology and overweight exposure to health care and consumer staples also had a negative impact.

Portfolio Activity

Dollarama Inc. (1.871%, 2026/07/08) was increased based on the company's strong credit profile.

Pembina Pipeline Corp. (3.71%, 2026/08/11) was sold in favour of investments with what the sub-advisor deemed to be more attractive risk-return profiles.

In equities, the sub-advisor added Element Fleet Management Corp. and Elevance Health Inc. to the Fund and increased Boyd Group Services Inc. Magna International Inc. and Sun Life Financial Inc. were sold. Holdings in Metro Inc., eBay Inc. and TD Bank were reduced.
